PROFILE

Versatile developer with experience in building responsive, user-friendly applications using modern frameworks. Skilled in problem-solving and developing creative solutions with hands-on experience in ASP.NET, C, and React.

EDUCATION

Sardar Patel Institute of Technology Bachelor of Technology - Electronics And Telecommunication Engineering - CGPA: 7.5/10	2022 - 2025 Mumbai, India
Government Polytechnic, Nanded Diploma in Information Technology - 86% First Class Distinction	2019 - 2022 Nanded, India

TECHNICAL SKILLS

Languages: Data Structures and Algorithms with C++, C#, Python, SQL, JavaScript, HTML, CSS

Frameworks and Tools: React.js, ASP.NET Core, Web APIs, Django, Dapper, Bootstrap, Github

Databases: MySQL, SQL Server, SQLite, XAMPP Server

PROJECTS

Learning Management System	July 2024
- Overview: Designed and developed a full-stack Learning Management System to streamline course management and user learning experiences. The system includes dynamic content rendering, robust user authentication, and a responsive user interface. - Features: 1. Rest-API driven architecture for efficient communication between backend and frontend 2. User authentication and role based access control (RBAC). 3. Dynamic content rendering and centralized management of static assets. 4. Lightweight SQLite database for fast data handling. 5. Responsive design to ensure seamless performance across devices. - Technologies: Django (python), React, SQLite, HTML, CSS, Javascript, Restful APIs	
GPND Examination Portal	May 2022
- Overview: Developed an efficient online examination system that automated result processing and reduced the need for manual supervision. Also, developed Admin module to generate quiz, manage students history, results and ranking. - Features: 1. Secure login and profile management. 2. Automated answer saving and error-free result computation. 3. Admin functionalities for content management. 4. Seamless feedback delivery to admin email - Technologies: HTML, CSS, Javascript, PHP, MySQL, XAMPP server, Bootstrap	
UDAAN - NGO Site	July 2023
- Overview: Developed a website for NGO UDAAN to support underprivileged children by facilitating donations, sharing organizational information, and promoting upcoming events. Also, developed user-friendly interface for secure donation. - Features: 1. User-friendly interface. 2. Real-time donation processing. 3. Secure payment gateway. 4. Engagement tools. 5. Mission alignment. - Technologies: HTML, CSS, Javascript, Node.js, MySQL	

CERTIFICATES

Bluestock – Front-end Developer
React – Udemy
HTML and CSS – IBM

IBM SkillsBuild – Front-end Developer
ASP.NET Core – Udemy

ACHIEVEMENTS & AWARDS

1st Prize - Poster Presentation	May 2022
State-level event organized for MSBTE diploma final year students. Presented a technical poster with a teammate and secured the top position.	
Winner - Carrom Tournament	June 2023
Won 1st place in a carrom competition held during the IEEE Conference at Sangli. The event was organized for student participants from various institutions.
